Elden Ring Features Key:

Dynamic Online Play: Tarnished Online continues to enhance the online component of the game through free-of-charge items, including characters and items.

A Reliable Server: The servers of Tarnished Online have recently begun to undergo regular maintenance. In the coming days, Tarnished Online will be unavailable for a limited amount of time.

No Overused Items: Because of maintenance, players will be unable to equip special items, such as ring special attack or characters with high attack, some of which are widely distributed via trade items.

A Rich Story: Plots and gameplay based on the story of Vanadiel, the Altadorian god of Shin Megami Tensei, will unfold one day at a time.

Tarnished Online features:

- **Production in Japanese:** Tarnished Online was developed with the collaboration of Atlus and in-house studios in Japan. This includes the key contributions of Yoshitaka Amano and the many Atlus staff who participated in design and development.
- **Full Character Customization:** A variety of items, such as special attack, armor, and magic can be equipped by character customization. Armed with a mixed bag of potent items, you can forge a powerful character with a unique appearance and play style.
- **Gorgeous Artwork:** Scenario maps will add a new and joyous aesthetic to the game, while cell-shaded characters bring fresh colors and movement to the game play itself.
- **Single-Player Dungeon crawling:** Players will be able to continue the story offline using New Game Plus or create a new character. Designed as a dynamic companion to New Game Plus, the Offline Mode offers an unforgettable adventure as the missing Vanadiel, going deeper into the rich story of Elden Ring.

Tarnished Online Features are Available to Players of New Game Plus

- **Custom Spell and Artifact Level:** Advanced customizations are also available, such as the level at which you acquire spells and artifacts.
