Browse library catalogÂ.Q: Mapping network drives with C# I am using C# to create some processes on our new server. One of these processes will be attempting to copy certain file types to a network share. The network share is not mapped to a drive letter. When I try and execute CopyFile the file is not copied. When I use CopyFile with a file that is located on the local machine the copy is executed. I would rather not use the UNC path for the network share. Can anyone shed some light on what I am doing wrong? Code below: public void Execute(string command) { ProcessStartInfo processStartInfo = new ProcessStartInfo(); processStartInfo.CreateNoWindow = true; processStartInfo.FileName = @"C:\WINDOWS\System32\cmd.exe"; processStartInfo.Arguments = command; processStartInfo.UseShellExecute = false; processStartInfo.WindowStyle = ProcessWindowStyle.Hidden; processStartInfo.RedirectStandardError = true;
