Russia's Economic Development for the Last Chance A closer look at the opportunities in Russia's energy sector for investors of all kinds OCTOBER 31, 2005 By Theodore Schleifer

When Gennady Timchenko was prime minister of Russia in 1992, he asked a visiting Swedish diplomat: "What do you think of Russia?" The envoy replied: "I think it's a dangerous country." Not much has changed in the ensuing 16 years. Despite Western fears of a renewed Russian cold war and a bleak economic outlook, President Vladimir Putin's government is doing a better job than its post-Soviet predecessors in meeting the challenges of Russia's rise. There are issues, however, that bear watching. The Kremlin has done nothing to advance the cause of democracy, and that will become more troublesome as the capitalist world increasingly relies on Russia for its energy needs. Facing an energy shortage and a shrinking oil sector in Russia's northeast, Timchenko stopped the sale of the Shtokman field, jointly owned by Gazprom and Lukoil. This license swap would have been an important step towards state-of-the-art production techniques at the field and a crowning triumph for Putin's industry minister, Sergei Kiriyenko. Putin, who as president is

the ultimate decision maker, has a more hands-on policy. He has chosen not to grant the billionaire Gennady Timchenko and his family presidential powers to manage Gazprom, and this fall he gave the same powers to Mikhail Khodorkovsky, his former economic adviser who in 2002 was arrested and jailed on charges of fraud and money laundering, though the case was widely believed to be politically motivated. As the former chairman of a leading Russian state firm, Timchenko has stood out in the council of Russia's "oligarchs,"
