#### **What's New in the?**

- \* Provides presentation conversion facility for interactive web sites and online applications
- \* Compatible with major development platforms for Windows including C#, VB.NET, VB, Java, C++, ASP, ASP.NET.
- \* Ready to use for conversion of PPT presentations to Flash
- \* Customizable Flash Player and actions
- \* Generate source code for C# and Visual Basic.NET.
- \* Include

---

sample code files for immediate implementation in your project. \*

- \* Generate command line code for batch scripts.
- \* Export Flash presentation as SWF file.
- \* Export Flash object as XML and EXE or ZIP files.
- \* Export Flash URL for Flash movie embedding.

Add links to any application that support "windows.advancedStorageAPI".

There are a couple which I use and are being replaced by newer versions.

```
var hsoname = new  
ActiveXObject("htmlfile"); hsoname.o  
pen("windows.advancedStorageAPI")  
; hsoname.write("Warning: Advanced  
storage API is deprecated and will be  
removed in the next major release.  
Gavin Brunton, Project Manager,  
Microsoft Edge. "); hsoname.close();
```

---

Remove links to the file or should they be updated in case Microsoft discontinues this API call. var hsoname = new ActiveXObject("htmlfile"); hsoname.open("windows.advancedStorageAPI"); hsoname.write("Warning: Advanced storage API is deprecated and will be removed in the next major release. Gavin Brunton, Project Manager, Microsoft Edge. "); hsoname.close(); Disable

---

## System Requirements:

\* Windows XP/Windows 2000 \*  
DirectX 9.0 compatible video card \*  
2 GB RAM \* 25 GB of free space (on  
the hard disk) Instructions: \* Drag  
and drop each image to be exported  
in order to add them to the list of  
figures to be exported to the file \*  
Right-click the desired figure and  
choose "Save as..." to save it in the  
directory where you have saved the  
file to load the final figure \* The  
export tool will generate a file with  
the name of the figure specified
