license keythe license key of the smaart multichannel live software (sml) is your unique serial number. it is made up of the three letters sml, your license number, and a serial number assigned to you by the software manufacturer. the license key contains no other information. in addition to the requirements listed above, we have been testing smaart v8 on a variety of older computers and observed that it is perfectly capable of running on computers with less powerful hardware. however, we will not recommend using them in production. the only exception to this is any computer with a hardware configuration that we have been able to reproduce and have confirmed to be a hardware problem. smaart v8 runs in any mode (standard, pro, or enterprise) on mac or pc. if you want to use enterprise, you need to use the latest version of smaart v8 (smaart v8 7). all enterprise functions are accessible from the main menu but are enabled by default. we have discovered a problem with smaart live 7 for windows that can result in crashes or freezes with intel hd or uhd 600 on-board graphics cards. it is likely with any intel series graphics card that uses the same driver. weve also discovered this problem with laptop versions of lenovo yoga 3 pro and yoga 900 (and possibly others). at this time, we do not recommend using windows machines withonlyintel on-board graphics as a result of this problem. the programs audio analysis software is offered to you as a donation. we plan to continue to support this software to keep it at the forefront of its industry for many years to come. this software is not free. you will be asked to make a donation to support this software. this is a donation to the author and his work. we welcome you to email us if you would like to make a donation to smaart@rationalacoustics.com.
