the tomtom one app uses your smartphone's gps and compass to get around and shows you the route with map and voice prompts. you can switch the tomtom one app to silent mode when you don't want it to disturb you, or customize the directions with the route preferences and detailed map options. - the tomtom one app can be used with the device that it was purchased with. the app is no longer available for use on devices purchased after march 2015. you can download the latest version of the app from the app store or google play store.- the tomtom one app must be used with the device that it was purchased with. you will need to go to a tomtom service centre, depending on which country you live in, and you will need to bring with you your current tomtom device, the serial number, and either your tomtom registration card or your original receipt from the purchase of your tomtom device. from the tomtom device itself, simply power on and select 'check for update'. the tomtom software will check to see if there is a new version available, and download this if the update is available. you will be asked if you want to update, and if you do, you will be asked to enter a serial number from the back of the tomtom, which is a unique number you were given when you first purchased your tomtom device. if you have a tomtom device with the serial number displayed on the back, you will know this. once the update is complete, the tomtom software will check that the serial number you entered is correct, and your device will be updated. once complete, a message will appear, telling you that the tomtom software is up to date. from this point onwards, the tomtom update will be performed automatically. if you want to force an update, you can choose this in the tomtom software. when you do this, you may be asked to enter your registration or serial number to verify the update. once complete, you will be asked to restart your tomtom device.

## Tomtom XI N14644 Europe Maps Download Free

i purchased the tomtom xl because i prefer the n2 series, but the map is dated from 2009. i assume that it is the same version as the one you sell. i would like to know if i have to purchase the new version or if i can still download the map from internet. it is just for a simple navigation in my car and i will not update maps on the phone. there is one more question that i have. i read that the premium version includes the ability to download maps from the internet, but there is a max. size for a map, so when there is a large one, it will not be downloaded. what is the size limit for the maps? the tomtom one, 3rd edition is designed to be more compact and convenient than ever, with a new streamlined and slimmer design. in addition to the previous two models, tomtom one, 3rd edition is the first tomtom product to feature two built-in speakers, with the ability to stream audio from the device. this is ideal for use while driving. tomtom xl will receive your speed and direction from your gps, while the 5gb of memory stores maps which are accessed when you are driving along your chosen route. tomtom xl is an easy to use device which will be an asset to anyone who wants to keep track of their journeys. most of the time we dont see the updates but when we do we are very impressed with the easy of use and the quick data transfer time from the tomtom xl. any tomtom gps users will know that the software is key, whether you have a brand new tomtom or a 10 year old one, you need to make sure that you update the software regularly. theres no risk with downloading these software updates, as long as you know which tomtom gps you have and the serial number.
