
FULL Portable Windows XP Live USB Edition 2008 V.2.02.zip _TOP_

To install Windows, boot from the Windows XP USB you prepared. When Windows boots the first time, it will go through the setup process and then reboot. You will need to boot using your Windows to Go menu option a second time to finalize the setup process and finally boot into your full Portable Windows. Use this one to install Windows XP SP3. This is an updated version of the Windows to Go. You will need to boot from your Windows to Go menu option to finalize the setup process, and finally boot into your full Portable Windows. Use this one to install Windows XP SP2. This is an updated version of the Windows to Go. You will need to boot from your Windows to Go menu option to finalize the setup process, and finally boot into your full Portable Windows. Is the Windows XP recovery environment which can be used to recover Windows if it becomes damaged by a virus, software installation problem, etc. It contains a repair tool that will repair Windows if it becomes damaged. However, this tool will not be able to restore a damaged Windows image to a non-damaged system and therefore, it will be unable to completely restore your system. Your Windows to Go installation process will create a VHD file which is 20GB in size. As such, it requires the drive to be formatted NTFS. Fat32 cannot support a file more than 4GB in size. Many flash drives you might find at local department stores won't be fast enough. You'll need a Very Fast Flash Drive. When Windows boots from the USB for the first time, it will go through the setup process and then reboot. You'll need to boot using your Windows to Go menu option a second time to finalize the setup process and finally boot into your full Portable Windows.
