For the latter, the Windows 10 Taskbar can get pretty annoying after a while. That's why, in the list of best Windows 10 desktop themes, we've got a few more options that are designed to spice up the taskbar without adding too much junk to your screen. Requirements: Windows 10 Pro What is Telegram? Telegram is a cross-platform instant messaging and group messaging app. The project is developed in the framework of the Internet and instant messaging, but it differs from other similar projects in many respects. For example, the project was developed in the framework of the app stores. It is one of the few successful projects, which did not give up on this approach. Now, the official version of the application is available for Windows, Mac, Android, and iOS. Features of Telegram Telegram is a mobile and web application. Unlike other similar applications, there is no need to download an app in order to use Telegram. On the contrary, if you install the official Telegram for Windows, you will be able to use the application even when you have not connected to the Internet. In addition, the official version of the application was optimized for mobile devices, with a good user experience. Besides this, Telegram has a good design and functionality, and supports various functions. However, if you compare the Telegram with other messaging applications, you will notice a lot of differences between them. Telegram is, in fact, not the first messaging app for Windows. It is used as a group messaging application, while other messaging apps, such as Skype and Viber, can be used to send texts or make video calls. In addition to this, Telegram can be used as an application to quickly send files or photos. Finally, Telegram can be used as an application that is designed to keep your conversations anonymous. Installing Telegram If you download Telegram on your mobile phone, you will be able to install the official Telegram mobile application on your Windows. However, if you want to install the application on your Windows PC, you will have to follow these steps: Steps to install Telegram - Open the Windows Start menu. - Click on the Windows button on the taskbar. - Type "start", then press Enter.
