Puran Registry Cleaner Free [32|64bit]

Puran Registry Cleaner is a program that scans, removes and fixes registry related errors. Its user interface is simple and easy to use. It is completely intuitive, does not give any errors during use and does not mess up Windows. System Requirements: Run Puran Registry Cleaner from a Windows compatible location such as: desktop, start menu or taskbar To get the most out of it, we recommend you to make sure the Internet is available. Run Puran Registry Cleaner as administrator. You can find more information about this utility in the Help file, which is enclosed in this download. Welcome to the General Support/Tutorials & Tips forum. This forum is for questions and problems with the software that are not specific to any particular product or service from Midisoft, its partners or the community. If you already registered and have not received a verification email please use the RE-REGISTER functionality. The My Documents and My Computer sections can be hidden, although it is not advised to do so. By removing these sections, you will save some disk space, since both of them are not required for the applications to function. The button "Show/hide main categories" can be located in the top-right corner of the main window. It is usually displayed there by default. If not, you can display or hide it via the menu. The buttons to add and remove registry keys and values are located in the bottom-right corner of the main window. You can display or hide them via the menu. This screenshot shows how some sections of the window can be set to hidden. It is not necessary to display or hide these sections. The main window will function the same. The program has an option to exclude some objects from future scans. This can be configured in the Options window. If an object is found to be missing, the error count and its type are displayed in the bottom-left corner of the main window. If an object is not found, its type is displayed. The error count is not displayed. The program provides a feature to generate a backup of the registry before making changes. This allows the user to restore the registry to the previous state if something goes wrong. In the configuration window, you can configure the settings of the program. The installer automatically adds its components to the Windows registry. This is done to make sure the program does not get corrupted during the installation.

What's New in the?

Puran Registry Cleaner is a powerful Registry cleaner for your computer. Scan Registry for Registry Errors and Fix Them! Why do Registry Errors happen? Every time your computer starts, Windows has to go through the Registry. If your computer runs slow or if you get any Windows Error, Mostly in the Control Panel, there are numbers, after that, there are check boxes, and it looks like: Control Panel The problem is that the registry may be slow and fattened up from all the clutter and the Easy registry cleaning and maintenance help computer run slowly. And the problem is that if the registry is slow, you may have troubles opening your computer. To fix this problem, run a Registry Cleaner. With Puran Registry Cleaner, you can remove unnecessary registry entries, fix registry errors, clean up temporary files, clear browsers, clear Internet temporary files, and optimize Windows registry. What can a registry cleaner do for you? Uninstall Unnecessary Programs The registry is a great location for Windows to store information about programs and files. But every time you install or uninstall programs, your computer has to go through the registry to read, write, and sometimes even delete these files. This may leave the registry bloated with unused and useless registry data that can slow down your computer. But before you start browsing through all those registry items, do you know that over 38.5 trillion useless data are in your computer? You can clean all of them up with a good registry cleaner. Fix Registry Errors Windows Error Codes One of the main causes for registry problems is Windows Error Codes. Windows Error Codes are numeric codes that appear on Windows screens and are associated with some problem that is occurring while a program is running. These error codes are usually caused by a program running out of memory. What you can do to fix a registry error is to change the memory or hard drive space of the computer. When you uninstall or download program, registry errors occur. Most of the time, you can simply uninstall or delete registry key. Clean Temporary Files (Cookies, Cache, Registry, etc.) Puran Registry Cleaner helps you remove cookies, internet cache, temporary files, history files, lost and found files, database cache, and Windows cookies. You can free up hard drive space by cleaning these files. Clean Up the Internet (Browsers) Puran Registry Cleaner has a good Internet cleaning feature, where it clears the cache of your browsing history, cookies, temporary files, download and installed software. It also removes cookies, history, visited links and other types of Internet cache. You can also clear it up manually or automatically. Clean Up Internet Explorer Just like the above menu, Puran Registry Cleaner has a good feature to clear Internet Explorer temporary files, cookies, cache, visited links, history, favorites, and stored passwords. It also cleans and removes cookies, history, internet cache, and temporary files for all
