Competence Mapping Database License Keygen

The Competence Mapping Database consists of 3 parts: o The Competence Mapping Tool The Competence Mapping Tool is your means to collect the data from your employees. Based on their roles and responsibilities you can define areas that your employees must manage or are responsible for. Within these areas you can collect data about the competences your employees have or need. You can add your own questions or predefined questions, based on the competences you have defined yourself. This means you can improve your employees skills by collecting data and by improving the education of your employees. It is like a questionnaire which your employees fill out. In addition you can enter your own data and update it based on your employees competence 4. □ The Competence Analysis The Competence Analysis is the engine that will collect and analyze your data. Your data are analyzed and a profile is created based on your criteria and based on the data you have collected. It can help you compare your employees or a team based on their capabilities. Based on the data you have collected, the competence analysis can help you make decisions on your employees, or based on the data on the development of employees it can help you create education plans for your employees. You can also export your data as CSV or PDF in order to analyze them in excel or to make use of them in your own program. oThe Competence Analysis Interface The Competence Analysis Interface is the main window in which you have the opportunity to manage the data you have collected with the Competence Mapping Tool. □ The Competence Analysis Interface The Competence Analysis Interface contains the following pages: oThe Competence Mapping In this page you can select which competence areas you want to work with. You can select the employees based on their roles and their personal information. Based on the options you selected you can view which employees are selected and you can view their competence areas. On the top you can add new areas of competence. oThe Analyses You can view all the results of your analyses. oThe Current Employees The current employees are based on your competence map and the competences you selected. Based on the competences you selected for your employees a profile is created. In addition you can view a list of your employees. 5. □ The Analysis The Analysis is the view in which the Competence Mapping Database analyzes the data you have
